1.2 Basic Functions and Application Scenes

This product is mainly used indoors. Combined with IP cameras, you can use this NVR to view live videos and recordings. It supports configuring basic parameters, and you can build a security monitoring network through web or other professional software developed by Dahua. Product functions include live view, recording playback, alarm and other auxiliary configuration functions.

1.3 New Features

Reduced the time to display the image completely when users switch from 1 split to 32 splits; fixed the issue that black screen and device crash occasionally occur on the local live image; fixed the issue that data packets are occasionally lost on the main Gigabit Ethernet port; fixed the issue that the channal images display abnormally when EPTZ is used.
